

Defender

Anti-theft security fog

Most property loss occurs in the initial minutes of a break-in before emergency services can be alerted and arrive on scene. Within seconds of a break-in the protected area is filled with a cloud of fog, disorientating and deterring the intruder forcing them to leave the premises.

Defender uses proven technology

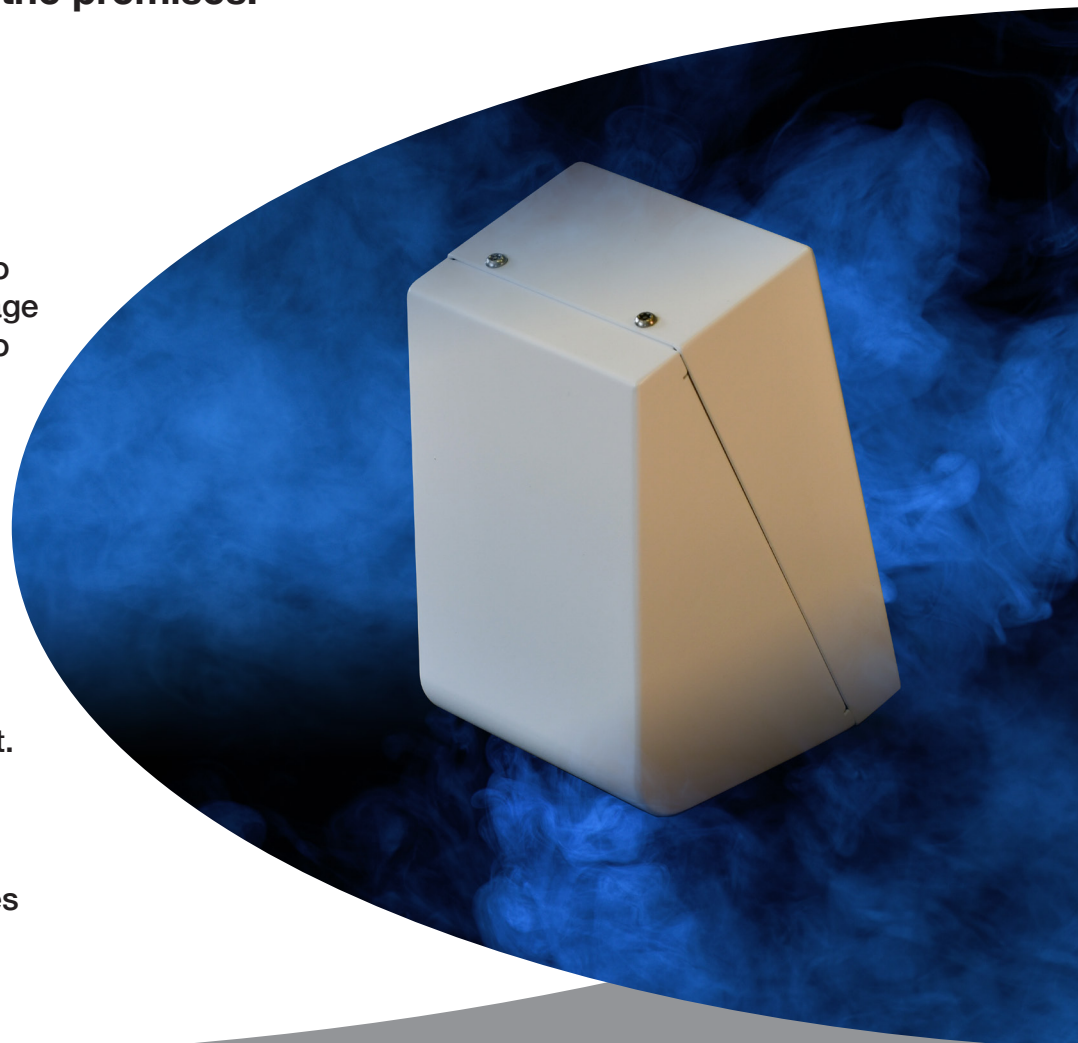

Security fogging is proven to help prevent theft and damage if an intruder has broken into a business.

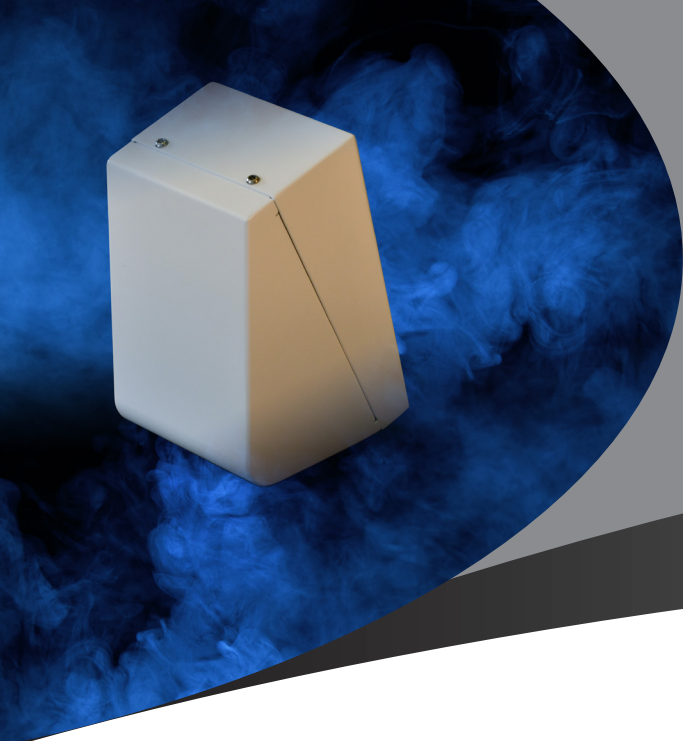

Defender protects in seconds

Releasing in 0.004 seconds and at a saturable volume of up to 100m³ the fog system is a deterrent that gives intruders no time to think, forcing them to retreat.

Defender is safe

The security fog is harmless and safe to breathe and does not harm the environment.

Why Defender fog device?

- Defender fog generators are absolutely safe
- Our systems are very simple to install
- Low power consumption
- Our fog generators are competitive in price
- We offer one of the densest fog systems on the market

Technical Data

Time of smoke	25 Sec
Saturable volume	Max 100m ³
Power supply	No
Activation voltage	1.5 – 12 VoltVCC
Ignition impulse (guaranteed activation)	2.5 mJ / Ohm
Current (4 mSec) for guaranteed activation	2 Ampere
Safe current (max 5 minutes)	0.36 A
Dimensions mm	110 x 190 x 130 (W x H x D)
Weight	Canister 400 grams Housing 905 grams
Operating temperature	-20C° / +75C°
Relative humidity with seal	90%
Fog colour	Blue
Housing colour	White
